#### **READ ALOUD TO RESPONDENT**:

This interview is <u>part of the regular intake process</u> for people entering this treatment program. It usually takes a <u>little over an hour</u> to complete, depending partly on how clear and direct you can be in giving your answers. I will be asking primarily about your <u>personal and family background</u>, your <u>friends</u>, your <u>criminal and legal involvement</u>, and your <u>drug use history</u>. When I ask about "<u>other drugs</u>" besides alcohol, I mean the use of any illegal drugs or anything else taken without a doctor's prescription. Many of my questions will refer to the "last 6 months" or the "last 30 days" before you entered this treatment program or, if you have recently been incarcerated, the time that immediately preceded jail.

It is very important that you be <u>open and honest</u>. Some questions may seem sensitive or embarrassing to you, but they are necessary to help us understand your problems and <u>plan</u> <u>your treatment</u> here.

Do you have any questions before we start?

<u>GENERAL INSTRUCTIONS TO INTERVIEWER</u>: Some items in this form require that answers be recorded "verbatim" and then coded into specific units of measurement -- such as "*months*" or "*amounts of alcohol.*" Also, write out clarifying comments or other explanations of answers as needed in the margins next to questions, and identify any items that the respondent <u>cannot or</u>

**NOTE ON JAIL/PRISON "TRANSFERS" TO TREATMENT**: Special instructions are necessary for defining the "last 6 months" and "last 30 days" before treatment for clients entering the program <u>directly from jail or prison</u>. In particular, they should be asked to report behaviors based on <u>the time immediately BEFORE jail/prison</u> in an effort to obtain more meaningful

#### PART I: CLIENT ASSESSMENT PROFILE

**INSTRUCTIONS**: This page should be completed for each client <u>immediately after the intake</u> <u>process</u> to summarize the interviewer's clinical assessments. The ratings should indicate <u>global</u> <u>severity of problems</u> which need to be addressed through treatment (either at this agency or through referral). The <u>rating scale</u> ranges from "1" (no treatment necessary) to "7" (treatment needed for life-threatening situation); intermediate ratings of "3", "4" or "5" identify symptoms of moderate intensity.
