Intake Version (TCU CEST-Intake)

Scales and Item Scoring Guide

Scoring Instructions. Numbers for each item indicate its location in the administration version, in which response categories are 1=Strongly Disagree to 5=Strongly Agree; ® designates items with reflected scoring. Scores for each scale are obtained by summing responses to its set of items (after reversing scores on reflected items by subtracting the item response from “6”), dividing the sum by number of items included (yielding an average) and multiplying by 10 in order to rescale final scores so they range from 10 to 50 (e.g., an average response of 2.6 for a scale becomes a score of “26”).
