Scales and Item Scoring Guide

Scoring Instructions. Numbers for each item indicate its location in the administration version, in which response categories are 1=Strongly Disagree to 5=Strongly Agree; ® designates items with reflected scoring. Scores for each scale are obtained by summing responses to its set of items (after reversing scores on reflected items by subtracting the item response from “6”), dividing the sum by number of items included (yielding an average) and multiplying by 10 in order to rescale final scores so they range from 10 to 50 (e.g., an average response of 2.6 for a scale becomes a score of “26”).

Note. Special items (Numbers 24, 30, 36, 41, 67, 73, 77, 82, 86, 98, 101, 114) are not listed because they do not currently load on any single scale. Some capture special information, however, and others are being tested for future additions to scales.

MOTIVATION FOR CHANGE (Needs/Pressure)

Program Needs

Your program needs additional guidance in –

1. documenting service needs of offenders for making treatment placements.
2. tracking and evaluating performance of offenders over time.
3. obtaining information that can document program effectiveness.
4. automating offender records for billing and financial applications.
5. evaluating staff performance and organizational functioning.
6. selecting new treatment interventions and strategies for which staff need training.
7. improving the recording and retrieval of financial information.
8. generating timely “management” reports on clinical, financial, and outcome data.

Training Needs

Your counseling staff needs more training for –

9. assessing offender problems and needs.
10. increasing offender participation in treatment.
11. monitoring offender progress.
12. improving rapport with offenders.
13. improving offender thinking and problem solving skills.
14. improving behavioral management of offenders.
